

For Maximosian.

What is engineering? I think that engineering is a way of thinking that creates new technology. Engineering is a type of science where people combine their knowledge from different fields. Engineers bring something new to help mankind and make people's lives.

What is system? System is a order that let people find something very fast, and sort information and things by categories.

What is system engineering? It is a discipline in engineering that needs to integrate complex systems into our lives.
